

### Main Features

- Up to 8.1 kW installed cabinet power
- User friendly user (LCD) operation interface
- Wide input voltage range
- Module design, front access for simple maintenance
- Compact design, saves valuable floor space
- Intelligent remote system monitoring and control

### Applications

- Telecom, wireless, datacom
- Medium power system

### Description

PCE DPR 2700 series power system, consisting of compact rack enclosures, 2700W rectifier modules and related power distribution units, is under the control of Control and Supervisory Unit. User can operate the system via the user friendly LCD interface. Meanwhile, with the PCE power system management software, the remote power system management function is also available through internet, intranet or telephone line.

PCE DPR 2700 series power system is designed to meet the demands of today's and tomorrow's wireless and wire-line network applications. It combines a compact, modular design and intelligent power features. The DPR-2700 series power module is UL, TUV approved and manufactured in our modern **ISO 9001** and **TL 9000** certified facility.
